Profile

Software Developer with a foundation in Java, Spring Boot, REST APIs, SQL, and backend application development. Hands-on experience building CRUD features, layered backend services, and database integrations, with additional project exposure to Python, FastAPI, and PostgreSQL. Familiar with API testing, debugging, Git-based collaboration, and writing maintainable code. Seeking an entry-level Java Backend Developer or Associate Software Engineer role.

SKILLS

Programming: Java, Python, SQL
Backend: Spring Boot, Spring Data JPA, Hibernate, JDBC, RESTful APIs, CRUD Operations, Layered Architecture
Databases: MySQL, PostgreSQL
Web: HTML, CSS
Tools: Git, GitHub, Postman, IntelliJ IDEA, Eclipse, Visual Studio Code

WORK EXPERIENCE

Techneat Info Solutions

Java Development Trainee — October 2025 - July 2026

- Develop backend features using Core Java, Spring Boot, JDBC, and object-oriented programming principles.
- Build and maintain RESTful APIs and implement CRUD operations using layered Controller–Service–Repository architecture.
- Integrate MySQL with Spring Data JPA and Hibernate for data persistence and retrieval.
- Test endpoints with Postman; debug application issues and apply input validation and exception handling.
- Contribute to an Employee Timesheet Management System, including timesheet creation, updates, approval, and retrieval.
- Use Git for version control and collaborate on maintainable code and technical documentation.

SM Marains Advances Gear Boxs India Private Limited

Software Developer — August 2026 - Present

- Developed and maintained **SML Oil Care**, a full-stack marine engine service management platform supporting customers, technicians, mechanics, and administrators.
- Developed and integrated RESTful APIs using **Python, FastAPI, SQLAlchemy, and PostgreSQL**.
- Implemented role-based dashboards, service request management, technician assignment workflows, and service tracking features.
- Worked on API integration, database operations, debugging, and resolving frontend and backend issues.
- Collaborated on application development, feature enhancements, and system testing to improve functionality and reliability.

PROJECTS

Employee Timesheet Management System April 2026 - June 2026

Technologies: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, REST APIs, Postman, Git

- Developed backend functionality to record and manage employee work hours.
- Implemented REST APIs for timesheet creation, updating, approval, and retrieval.
- Applied layered architecture, CRUD operations, input validation, and exception handling.
- Integrated MySQL using Spring Data JPA and Hibernate; tested API behavior with Postman.
-

SM Marains Engine Service Management System August 2026 - October 2026

Technologies: Next.js 14, React, TypeScript, Tailwind CSS, Python, FastAPI, SQLAlchemy 2, PostgreSQL, Docker, GitLab, Web Push, OCR.Space, Google Cloud Vision, SMS APIs.

- Develop a full-stack marine engine oil service-management platform supporting customers, technicians, mechanics, toll operators, zonal managers, and administrators
- Integrate invoice OCR using OCR.Space and Google Cloud Vision, including duplicate detection and oil-quantity validation.
- Implement OTP authentication, signed HTTP-only sessions, password recovery, and role-based access workflows.
- Support automated oil-service reminders through in-app notifications, browser push notifications, and SMS APIs.

EDUCATION

Duthie Higher Secondary School for Girls

Higher Secondary Certificate - 67% 2021 - 2022

Amrita College of Engineering and Technology

B.E. Computer Science and Engineering - 7.88 2022 - 2026

LANGUAGE

Engilsh

Tamil
